Padayao, Jarvis Millan

Full Stack Engineer — Django, React & IoT

millanjarvis421@gmail.com
iamjarvis.vercel.app
Yokohama, Kanagawa, Japan

CORE EXPERTISE

- **Python** — Django · FastAPI
- **TypeScript** — React
- **IoT** — Gateways · Devices
- **ETL** — Data pipelines

PROFILE

Solution-driven Full Stack Engineer with over 9 years of experience building web and mobile products, now focused on IoT systems. Primary stack is Django REST Framework on the backend and React with TypeScript on the frontend, shipped as containerized Docker services behind Nginx. Experienced in designing APIs that connect cloud software to physical devices through dedicated gateways, maintaining and extending existing production applications, and delivering in fast-paced, highly collaborative teams. Uses AI-assisted engineering with Claude Code to move faster without sacrificing code quality.

SKILLS

BACKEND

Python 4 yrs	Excellent	Django · DRF 3 yrs	Excellent
FastAPI	Very Good	SQL · PostgreSQL	Very Good
PHP	Good		

FRONTEND

TypeScript 4 yrs	Very Good	ReactJS 5 yrs	Very Good
JavaScript	Very Good	HTML	Excellent
CSS	Very Good		

LANGUAGES

English	Very Good	Japanese	JLPT N3

AI

Claude · **Claude Code** · **Compound Engineering**

TOOLS & INFRA

Docker · Docker Compose · Nginx · Reverse Proxy · IoT Gateways · REST APIs · ETL · Git

Excellent · Very Good · Good

EXPERIENCE

Full Stack Engineer

2025-05 — Present

Traas on Product Co., Ltd. · Yokohama, Kanagawa, Japan

Stack Django REST Framework / React + TypeScript / Docker / Nginx / PostgreSQL / IoT

Working entirely on IoT applications in a fast-paced environment, collaborating closely with the development team to build web systems that connect our software to the products our customers need.

- Build APIs with **Django REST Framework** that communicate with our dedicated server gateways, which in turn talk to the specific devices and products required by each customer.
- Chose Django as the primary backend for our systems over the past year, building on 3 years of DRF experience; also maintain and extend existing Django applications in production.

- Develop frontends in **React with TypeScript**, paired with DRF backends as the team's standard full-stack setup.
- Containerize every project with **Docker** in a single unified setup, with **Nginx** as a reverse proxy in front of the API and frontend services.
- Coordinate deployments of new software, feature updates and fixes.

> ***Autonomous Building Control Engine***
> Developing an engine that controls office air conditioners, lighting and IoT sensors entirely on its own. The system reads sensor data, makes control decisions and operates the equipment without manual input, while proactively suggesting adjustments to users based on their specific needs and demands.

> ***AI-Assisted Engineering***
> Use Claude Code and Claude as my primary AI tools, with a personalized setup of custom settings, plugins and modifications that speeds up day-to-day delivery. Apply compound engineering so each task leaves behind reusable context, rules and tooling that make the next one faster, and manage tokens and context deliberately to keep long working sessions running without interruption.

Full Stack Engineer

2023-09 — 2025-04

Make You Smile Co. Ltd. · Yokohama, Kanagawa, Japan

- Developed full-stack development tools to produce holistically envisioned applications for both Web Application System and platforms IOS and Android devices
- Built, tested and deployed scalable, highly available and modular software products
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements
- Implemented Git for version control across various networks
- Coordinated deployments of new software, feature updates and fixes.

Software Application Engineer

2022-09 — 2023-07

Five9 Inc. (San Ramon, California) · Davao, Philippines (Remote)

- Worked Closely with different members in finance team to understand the business requirement and prepare data sets for data analysis
- Enhancing applications by identifying opportunities for improvement, making recommendations and designing and implementing systems.
- Production support on current applications and programs
- Investigates problem areas and suggest solutions around it
- Documents and demonstrates solutions by developing documentation, flowcharts, layouts, diagrams, charts, code comments and clear code.
- Worked across multiple facets of a project and juggle multiple tasks at the same time.
- Develops software solutions by going through business requirements, conferring with users, and studying systems flow, data usage, and work processes.
- Coordinated with project management staff on database development timelines and project scope

Web and Software Developer

2019-07 — 2022-06

Freelance (Project Based) · Sano, Tochigi (Remote)

- Revised, modularized and updated old code bases to modern development standards, reducing operating costs and improving functionality
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development
- Designed intuitive graphical user interfaces using knowledge of serial communications and database design to improve user experience
- Coordinated with project management staff on database development timelines and project scope
- Did small projects/maintenance on clients I have worked in the past.

Web and Mobile App Developer

2017-09 — 2019-06

Power Virtual Writing Solutions, Inc · Davao, Philippines

- Tested applications prior to final review to verify issue resolution
- Created custom mobile applications using native technologies
- Researched and developed both mobile Android app and IOS app to help users locate services within immediate location
- Provided dedicated support and timely issue resolution to clients following successful app launch
- Delivered weekly progress report to executive staff and informed applicable parties of upcoming milestones
- Employed full-stack development tools to produce holistically envisioned applications for both IOS and Android devices
- Built, tested and deployed scalable, highly available and modular software products
- Worked closely with clients to establish specifications and system designs
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements
- Implemented Git for version control across various networks
- Coordinated deployments of new software, feature updates and fixes.

Web Developer

2017-04 — 2017-09

Datamarked Inc. · Davao, Philippines (Remote)

- Balancing aesthetics with functionality for exceptional user experiences.
- Designed PSD to HTML CSS JS conversion for creating websites.
- Collaborated with internal team members and customer representatives to clarify relationship of business and project goals and obtain enhanced perspective of development process.
- Contributed valuable features to enhance client's business web system

EDUCATION

Bachelor of Science in Information Technology — **2013-06 — 2017-04**

Holy Cross of Davao College (HCDC) · Davao City, Philippines

CERTIFICATIONS

Japanese Language Proficiency Test – N3 Level Passer — **2023-07**

React JS Complete Guide · Udemy Course — **2022-05**
